Keep a Safe Distance

Coughing? Sneezing?
Unless your symptoms are caused by seasonal allergies or another non-infectious condition, please sit away from other people. Choose a seat by an open window or door for better ventilation. Others will appreciate your efforts.

Feeling Sick?
Stay home. Consult by phone with a health care provider if you have flu-like symptoms (fever, sore throat, coughing). Students: Call Gannett at 255-5155.
