for Peace of Mind

Syphilis, chlamydia, HIV, and gonorrhea, are on the rise in Tompkins County. Many individuals infected have used online apps to facilitate sexual hookups. As a result, they have limited contact information and may not be able to notify sex partners of exposure. Infections can be spread through oral, anal, and vaginal sex. Remember, STDs can be present without symptoms, so you can’t “tell by looking.” Get tested, and use protection to safeguard your sexual health & well-being.

Connect to testing HERE

- Gannett Health Services (Cornell University only)
- Hammond Health Center (Ithaca College only)
- Planned Parenthood
- Private physicians
- TC3 (HIV testing only)
- Southern Tier AIDS Program (STAP) (HIV/HCV testing only)

STDs are on the rise on our campuses and in the county. Get TESTED. Be SAFE.
