

■ worried about syphilis ?

■ Syphilis is a curable and easily-treated bacterial infection, but often there are no symptoms.

■ What can you do?

■ wear a condom

■ This bacteria is most easily contracted during unprotected oral, anal, and vaginal sex.

■ Using protection reduces the risk of infection with syphilis and other sexually transmitted infections.

get tested

It's easy to diagnose syphilis with a blood test. And, given the risk of co-infection, consider testing for HIV too.

Ithaca-area test sites:

- Gannett Health Services (*Cornell only*)
- Hammond Health Center (*Ithaca College only*)
- Planned Parenthood
- Private physicians
- Tompkins County Health Department (*HIV testing only*)
